

Pro-grade pitching + hitting analytics for less than 2% of TrackMan.

Every bullpen. Every batting practice. One report. Branded for your program.

■ Pitching Lab

Velocity, spin, movement, elbow torque (Nm), mechanics critique, drill prescription with video tutorials. Catch UCL risk before the injury — paper trail when parents ask.

■ Hitting Lab

Bat speed, exit velo, launch angle, barrel rate, hip-shoulder separation. Pro-style spray chart and zone heat map. 27-drill library with curated YouTube tutorials.

■ Parent-Ready Reports

Branded PDF after every session — pitching or hitting. Text it to the parent before they leave the parking lot. Recruiting-tape-worthy.

Who this is for

■ HS Varsity Coaches

Avoid the UCL injury that costs you your job. Show the AD you're tracking. Parents get a polished report after every outing.

■ Travel Ball Directors

Your \$2-3k parents want the same data as the program down the road. Branded reports per kid = retention. Velocity gains = recruiting tape.

■ Training Facilities

Charge premium for 'data-driven development.' Beat the Rapsodo facility on cost. Justify \$175/hr lessons with the report.
